TOP FITNESS

The outdoor fitness machines from the Top Fitness® line by Legnolandia® are made of pickled stainless steel, with seats and backrests in recycled and recyclable polyethylene, sourced from industrial waste, and powder-coated plates in our iconic colors.

The carefully studied biomechanics utilize the user's body weight, offering a wide range of use for all anthropometric percentiles.

With its 20 options, the **Top Fitness®** series covers a wide range of exercises:

Strength and Endurance

Exercises aimed at increasing muscle mass and strength using body weight.

Flexibility and Mobility

Exercises that improve joint range of motion, reduce muscle stiffness, and help prevent injuries.

Cardiovascular

Cardio exercises that enhance heart health and stamina.

Bodyweight Training

Calisthenic exercises that use your own body weight to build strength and endurance.

The **Top Fitness®** line as a whole represents a complete circuit for training or muscle activation, ensuring users the safety of equipment that is well-designed with careful attention to biomechanics and ergonomics. It is expertly crafted and requires minimal maintenance thanks to modern and automated assembly systems.

Top Fitness® is today the best choice for parks, urban areas, or recreational spaces seeking to rejuvenate through outdoor physical activity.
